

5. Modification of the X-UFO for BL motors

UFO Doctor, July 6th, 2011

This is a very short report:

1. I wrote a draft about installation of BL-motors
2. I had nice flights with X-UFO and SwissGyro
3. I installed the additional Yaw-Sensor:

And now the bad news:

The flight control of the X-UFO does not fit with the BL-motors. There is an extreme jitter in controlling the BL-motors

It is not possible to control the speed of the motors softly by the RC throttle. The motors accelerate and decelerate at its own.

So I regret to say that I had to give up the BL mod

Sorry!

Kind regards

UFO Doctor
